## **DETAILED ACTION**

### **Status**

This is in response the amended claims dated on 08/15/2006. Office action sent on 05/24/2010 has been vacated.

### ***Allowable Subject Matter***

Claims 10 -23 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 10-23 are considered allowable since when reading the claims in light of the specification, as per MPEP § 2111.01, In re Sneed, 710 F.2d 1544, 1548, 218 USPQ 385 (Fed. Cir. 1983), none of the references of record alone or in combination disclose or suggest the combination of limitations specified in independent claims 10,18, and 21.

The closest prior arts (US 2001/0000805 A1; 6,542,843 A1; 5,055,752) teach or suggest (a) generating a nominal milling program for manufacturing of fluidic surfaces in a region of a flow inlet edge and/or a flow outlet edge for an ideal gas turbine blade; (b) measuring an area of an actual gas turbine blade in a region of a flow inlet edge and/or a flow outlet edge thereof.

However; the prior art of record differs from the applicant's invention in that it fails to teach or fairly suggest " wherein the nominal milling program for the region of the flow inlet edge and/or the region of the flow outlet edge comprises several nominal milling paths including a first nominal milling path in a region of a suction side, a second nominal milling path in a region of a pressure side, and, interposed between the first

and second nominal milling paths is a third nominal milling path for a transition region between the suction side and the pressure side wherein each of the nominal milling paths comprises several nominal path points" as recited in claim 1, in combination with the remaining features and elements of the claimed invention.

The prior art of record differs from the applicant's invention in that it fails to teach or suggest "wherein the nominal milling program includes a first nominal milling path in a region of a suction side, a second nominal milling path in a region of a pressure side, and a third nominal milling path for a transition region between the suction side and the pressure side, wherein each of the nominal milling paths include a nominal path point. " as recited in claim 18 and 21, in combination with the remaining features and elements of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled " Comments on Statement of Reasons for Allowance.
